Closure of the Brenner Corridor 30 May 2026

On 30 May 2026, an officially notified assembly will take place on the A 13 Brenner motorway near Mautritsch. This will result in extensive traffic closures along the entire Brenner Corridor in Tyrol, Austria.

Due to these closures, it will not be possible for through traffic to use the Brenner Corridor on 30 May 2026. There is no local alternative route. Train services are not affected by the closures.

Despite the closures, arrival to and departure from Tyrol will still be possible. However, significant traffic delays are to be expected on 30 May 2026.

It is therefore recommended that you avoid arriving or departing on that day.
